

Chocolate Waterfall

Pure Heaven!

The chocolate waterfall, when operating, looks like a three-tiered chocolate wedding cake. Gourmet Belgian chocolate cascades off of each layer in sheets and guests dip skewered fruit or food items into the chocolate flow - pure heaven!

The secret to the waterfall is a specially designed corkscrew, which rotates and carries the melted chocolate from the heated basin to the top. Once at the top, the chocolate overflows and cascades down over the tiers of the waterfall.
